## TECHNICAL SKILLS

- React
- Javascript
- Node.js
- PHP
- SQL, MongoDB
- HTML, CSS
- Git, GitHub
- Object Orientated programming
- Testing
- Using frameworks - Slim, Bootstrap, Express

## EMPLOYMENT HISTORY

### **Alpine Elements** *(Nov 2023 - Apr 2024)*

- Chalet Host in the French Alps, responsible for 14 guests and maintaining a chalet.
- Developed great public speaking and time management skills whilst working in a high pressure environment.

### **University Student Ambassador**

*(Jan 2022 - Jul 2023)*

- Represented the university during open days and events, giving tours to prospective students.

### **Hospitality** *(2016-2024)*

- Inc. Pubs, cafes, restaurants, and events.
- Full time and part time.
- Developed excellent interpersonal, communication, and teamwork skills.

## INTERESTS

- I like to stay active, I run, play tennis and golf and recently completed my first half marathon.
- I relax by listening music, meeting friends, watching football and going to events and festivals.
- I also love to travel. I did a Ski Season where I lived in the Alps and I have backpacked around New Zealand and South East Asia.

## PROFILE

I am a motivated and enthusiastic full stack software development student, eager to start a tech career as a developer. During my BSc Psychology degree, I mastered tools such as PsychoPy, Excel, and JASP for experiment development, data manipulation and statistical analysis. This led to me independently pursuing software development, learning HTML, CSS, and JavaScript before enrolling in a full-time Full Stack Developer bootcamp at iO Academy.

## EDUCATION

### **University of Leicester, BSc Psychology** *(2020-2023)*

- Recipient of the Leicester award and commendation from the Board of Examiners.
- Upper second class (69.84 average) inc. 80 in Introduction to programming.

### **iO Academy, Full Stack Track** *(Jul 2024 - present)*

- 16 week in-person bootcamp.
- Completing a range of projects as an individual and part of a scrum team.
- Below is a taster of my favourite projects I have completed.

## PROJECTS

### **Front End Application**

We developed a job listing application using Javascript and React . We utilised react's virtual DOM and state management to create real job searching, filtering and, user interaction.

[GITHUB](#) | [LIVE](#)

### **Back End Application**

We developed an API for an existing front end. We utilised OOP principles with PHP and SQL queries to create URL endpoints for a furniture store.
