EMPLOYMENT HISTORY

Alpine Elements *(Nov 2023 - Apr 2024)*

- Chalet Host in the French Alps, responsible for 14 guests and maintaining a chalet.
- Developed great public speaking and time management skills whilst working in a high pressure environment.

University Student Ambassador

(Jan 2022 - Jul 2023)

- Represented the university during open days and events, giving tours to prospective students.

Hospitality *(2016-2024)*

- Inc. Pubs, cafes, restaurants, and events.
- Full time and part time.
- Developed excellent interpersonal, communication, and teamwork skills.

INTERESTS

- I like to stay active, I run, play tennis and golf and recently completed my first half marathon.
- I relax by listening music, meeting friends, watching football and going to events and festivals.
- I also love to travel. I did a Ski Season where I lived in the Alps and I have backpacked around New Zealand and South East Asia.

PROFILE

I am a motivated and enthusiastic full stack software developer, eager to advance my career in tech. My passion for problem solving started during my BSc Psychology degree, where I mastered tools such as PsychoPy, Excel, and JASP for experiment development, data manipulation and statistical analysis. This led to me independently pursuing software development, learning HTML, CSS, and JavaScript before enrolling in a full-time Full Stack Developer bootcamp at iO Academy.

EDUCATION

iO Academy, Full Stack Track *(Jul 2024 - Oct 2024)*

- 16 week in-person bootcamp.
- Completed several projects independently and in an Agile scrum team.
- Became proficient in various technologies developing into a skillful and well rounded full stack developer.

University of Leicester, BSc Psychology *(2020-2023)*

- Recipient of the Leicester award and commendation from the Board of Examiners.
- Upper second class (69.84 average) inc. 80 in Introduction to programming.

PROJECTS

Front End Application

We developed a job listing application using Javascript and React. We utilised React's virtual DOM and state management for job searching, filtering and, user interaction.

[GITHUB](#) | [LIVE](#)

Back End Application

We developed an API for an existing front end. We utilised OOP principles with PHP and SQL queries to create URL endpoints for a furniture store. Please select the title 'furniture store' after opening the live version.
